

Sanitation Partnership for Cockroaches

In order to achieve our common goals, your cooperation is required in the following areas

- Provide access at required time of day.
- Allow adequate time for service to be performed
- Provide service professionals access to all areas; including locked areas.
- In order to allow access to all areas and prevent pesticide contamination, prepare your area for professional servicing as follows:
 - Remove dishes, cookware and food from under counters, in cabinets, on tables and shelves, and cover them with plastic, bag them or place them in a sealed container.
 - Remove open and uncovered food items.
 - Remove or bag clothing articles from dressers and closets.
 - Pull furniture away from walls and remove items from underneath furniture.
 - Allow access to all walls.
 - Any articles of clothing left out will need to be washed after service.

After service, wash all food contact surfaces which may had contact with pesticide. Pest services cannot be performed unless the above preparation and cooperation is provided.
