

Cockroach Treatment Prep Sheet

In order to achieve our common goals, your cooperation is required in the following areas

- *Provide access at required time of day.

- *Provide service professionals access to all areas; including locked areas.

In order to prevent pesticide contamination, prepare your area for service as follows:

- *Remove dishes, cookware and food from under counters, in cabinets, on tables and shelves, and cover them with plastic, bag them or place them in sealed container.

- *Remove open and uncovered food items.

- *Fully empty under kitchen and bathroom sinks.

- *Allow access to walls, pull furniture away from walls and remove items from underneath furniture.

- *Remove pets, pet toys and dishes.

- *Leave home for 4 hours so that treatment may fully dry.

After Service:

- *Wash all food contact surfaces which may have had contact with pesticide.

- *Do not use bleach or bleach-based products.

- *Do not apply any over the counter products or self-treatment remedies.

Pest Services cannot be performed unless the above preparation and cooperation is provided.
